Trustee	CIMB Commerce Trustee Berhad
Solicitors	M.K Chen & Leong
Regulatory Advisers/Other	Federation of Investment Managers Malaysia
Auditor	Ernst & Young
Tax Consultants	Ernst & Young Tax Consultants Sdn Bhd

KEY RISKS

5. What are the key risks associated with this product?

General risks of investing in a unit trust fund :	
Market risk	This risk refers to fluctuations in the market due to changes and developments in the economic climate, political stability and technology of the country. This risk can be reduced by investing in a well-diversified portfolio of securities from the different market sectors.
Interest Rate risk	Interest rate risk is crucial in a bond fund since bond portfolio management depends on forecasting interest rate movements. Prices of bonds move inversely to interest rate movements. Therefore, as interest rate rises, the prices of bonds decrease and vice-versa. Bonds with longer maturity and lower yield coupon rates are more susceptible to interest rate movements.
Credit/Default risk	Bonds are subject to credit/default risk. In the event that the issuer of the instrument is faced with financial difficulties, their credit worthiness will decrease, which may in turn lead to a default in the payment of the principal and interest/profit (Shariah).
Loan financing risk	This risk must be considered carefully when unit trust investment is financed by a loan. You should be aware that you might be forced to provide additional funds or security to top up on loan margins if the value of your investment goes down. Therefore, you will bear the additional responsibility and cost of financing the loan. You might also risk losing your initial capital.
Liquidity risk	This risk refers to the ease of converting an investment into cash without incurring an overly significant loss in value. If a unit trust fund has a large portfolio of stocks issued by smaller companies, the relatively less liquid nature of those stocks can cause the value of the fund to drop. This is because there are generally less ready buyers of such stocks as compared with the stocks of larger and more established companies. This risk is managed by taking greater care in stock selection and diversification.
Management company risk	This risk arises when the Manager does not adhere to the investment mandate of a fund. However, this risk is greatly reduced by the presence of the funds custodian, the Trustee, whose duty is to ensure that the fund's investment mandate is complied with. Poor management of the Manager may jeopardise the unit trust fund's performance.
Non-compliance risk	This risk refers to a lack of fiduciary duty on the part of the compliance unit to ensure compliance with laws, rules and regulations, internal policies and procedures or work ethics standards to the best interest of the unit holders. In order to minimize this risk, a dedicated compliance unit and effective compliance procedures should be implemented and monitored to ensure the fund management company and its investment manager comply with the relevant laws and guidelines at all times.
Inflation risk	Inflation risk is the potential loss of purchasing power of your investment due to a general increase in consumer prices. Inflation erodes the real rate of your return, that is, the return after you take away the inflation rate.
Risks of Shariah non-compliance	Investments in Shariah based funds are subject to the list of securities approved by the Shariah adviser/Committee. The investment manager invests in securities based on this list and there is a possibility that any securities might be removed from the list when the list is reviewed by the relevant agencies/Shariah Adviser. When the securities are no longer Shariah compliant, the investment manager would have to dispose-off such securities and the fund may potentially suffer losses due to the disposal of the non-Shariah compliant stocks.
Specific risks of the Fund:	
Market risk	This will arise when prices of stock/shares, bonds and money market instruments fluctuate due to various factors such as changes in the prevailing economic conditions, industry trends, political and social environment and movement of foreign financial markets. This fluctuation will cause the NAV or unit prices to fall or rise and likewise affect the income portion of the Fund. To mitigate this risk the Fund Manager will monitor the financial markets closely and act on any adverse news accordingly.
Credit/Default risk	This will arise when the borrower or issuer of money market instruments or other fixed income securities default on its obligations to pay interest/profit and repay the principal amount borrowed. This may cause the value of the Fund to be affected. To mitigate this risk the Fund Manager will set limits to each exposure and will regularly monitor the credit worthiness of the company they invest in.
Interest Rate risk	This risk, which is related to a drop in the price of money market instruments and other fixed income securities when interest rate rises and vice-versa, will have an impact on the NAV or unit prices. The magnitude of the drop in price is normally greater for longer-term securities rather than shorter-term securities as they are more sensitive to interest rate changes. To mitigate this risk, the fund manager will monitor the duration structure of the fixed income portfolio.
Liquidity risk	This risk is normally associated with low volume of trade, as some investments are not as liquid as deposits, making it difficult to dispose off at a desired price. Should an investment become illiquid, it may be sold at a discount to its fair value, causing the NAV to fall. This risk is more pertinent for investments in smaller companies, as there are relatively less ready buyers of such stocks/shares compared with bigger and more established companies. To minimise this risk, the Fund Manager will exercise care in selecting the right mix of stocks/shares.
Specific Stock risk	This risk is associated with large fluctuations in the prices of stocks/shares of any of the companies that the Funds invest in thereby causing the NAV or unit prices to fluctuate accordingly. Fluctuations are caused by the performance and the prospects of individual companies. To mitigate such risk, the Fund Manager will monitor closely the price movement of the companies they invest in and will take immediate steps to alter the mix when necessary. The impact of an individual stock/share is managed by the Fund Manager by having a diversified portfolio and an asset allocation plan that includes both liquid assets/cash.

FEE & CHARGES

6. What are the fees and charges involved?

This part informs investors about the fees & charges involved.

Charges Directly Incurred: Describes the charges that you may incur directly when you buy, repurchase, switch or transfer units of the Funds.	
Sales Charges	Currently there will be no sales charge for this fund. The Manager may however, at its sole discretion, reserve the right to impose sales charge for any Fund subject to the provisions of the Deed and the SC Guidelines.
Repurchase Charges	There is repurchase charge imposed for this fund at a declining rate based on the following computation: 1st Investment Year - 5.0 % 2nd Investment Year - 4.0 % 3rd Investment Year - 3.0 % 4th Investment Year - 2.0 % 5th Investment Year - 1.0 %, and no repurchase charge thereafter. Investment Year" refers to the one year period of 365 days commencing from the date of purchase of units of this fund, as the case may be and investors may negotiate for a lower repurchase charge.
Transfer Fee	Unit holders are allowed to transfer their unit holdings subject to the terms and conditions as spelt out in the Deed. The transfer is allowed within the same Fund by completing a Transfer Form and signed by both the transferor and the transferee. The Manager will impose a fee of RM5.00 per transfer.
Switching Fee	Switching is a facility which enables unit holders to convert the units that he holds in a Fund to units of other unit trust fund also managed by the Manager. The units converted will be valued at the Buying price of those units or at NAV of the Fund. Effective from 24 July 2008, the Switching Fee for this fund is waived and there is no limit as to the frequency of the switching transaction. The minimum amount to switch is 1,000 units or such other amount as the Manager may at its discretion deem appropriate.
Fee & Expenses Indirectly Incurred: Describes the fees that you may incur indirectly when you invest in the Funds.	
Annual Management Fee	The Manager is entitled to an Annual Management Fee which is chargeable based on the following rate/s: IDEF - For this Fund, 1.00% per annum of NAV. The fee is calculated and accrued on a daily basis and payable to the Manager on a monthly basis.
Trustee Fee	The Trustee is entitled to an annual Trustee Fee based on the following rate: IDEF - For this Fund, 0.07 % per annum of NAV, subject to a minimum of RM18,000 per annum. This fee is calculated on a daily basis.
Other Charges:	
Other Charges	In executing investor' s transaction, charges and expenses including but not limited to bank charges, telegraphic transfer charges and courier charges are to be borne by the investors. The Manager reserves the right to vary such conditions from time to time, which shall be communicated to investors in writing

Note: The Manager and the Trustee must ensure that any fees or charges to be incurred or incurred are in accordance with the Deed. There are fees and charges involved and investors are advised to consider the fees and charges before investing in the Funds.

TRANSACTION INFORMATION

7. What are the transaction details?

Minimum Initial Investment for each fund	RM1,000 or such other amount as the Manager may at its discretion deem appropriate.
Minimum Units Held / Minimum Balance of Units held for each fund	1,000 units or such other amount as the Manager may at its discretion deem appropriate.

Cooling off period	The cooling-off period is six (6) Business Days from the date of receipt of the initial application

	form by the Manager. This right is only given to an investor who is investing in any unit trust fund managed by the Manager for the first time and such cooling-off right is not given to: (a) a corporation or institution; (b) a staff of the Manager; and/or (c) a person registered with a body approved by the SC to deal in unit trust.
Period of Payment of Proceeds from Redemption	Unit holders may redeem units on any Business Day and receive payment of repurchase proceeds within 10 days of receiving the repurchase request.

VALUATIONS AND EXITING FROM INVESTMENT

8. How often are valuations available?

The valuation point will be carried out on each Business Day at the close of the Bursa Malaysia. Should investors rely on the local dailies, the unit price is published in the local dailies on the following Business Day.

9. How can I exit from this investment and what are the risks and costs involved?

To exit from this investment, you may withdraw from the Fund, switch out of the Fund or transfer your unit holdings to other investors. Please refer to the "Fees & Charges" and "Transaction Information" sections for details on switching and transfer facility. Withdrawals can be made from the Fund by completing a redemption form and sending it to the head or branch offices of Inter-Pacific Asset Management Sdn Bhd. For Institutional Marketing sales, please go to the head or branch offices of Inter-Pacific Asset Management Sdn Bhd. There is no restriction on the frequency of withdrawals. The amount that you will receive is calculated by the withdrawal value less the Withdrawal Fee, if any. That amount will be paid in RM within ten (10) calendar days. Any applicable bank charges and other bank fees incurred as a result of a withdrawal by way of telegraphic transfer, bank cheque or other special payment method will be charged to you.

THE MANAGER
